

Patrick Tucker is the technology editor for Defense One.

He writes on information technology, AI, big data, predictive analytics, cybernetics, nanotechnology, genetics and genetic ethics, invention, climate change and climate change mitigation, demography, literacy, public policy and neuroscience. In addition to THE FUTURIST magazine, where he served as an editor for nine years, his writing has appeared in Slate, Salon, The Atlantic, Quartz, MIT Technology Review, National Journal, The Wilson Quarterly, The Johns Hopkins Magazine, the Utne Reader, and as part of

Discovery channel broadcasts and special features. His first book, *The Naked Future: How the Science of Prediction Changes Everything*, was published in March 2014 from Current, a Penguin imprint.

He has had the good fortune to interview such technologists, policy experts, and visionaries as MIT roboticist Rodney Brooks, Google research director Peter Norvig, military strategist Edward N. Luttwak, former U.S. House Speaker Newt Gingrich, Rep. Dennis Kucinich, former CIA director Robert James Woolsey, tech guru Tim O'Reilly, environmentalist Lester Brown, flying-car-creator Paul Moller, historian Lewis Lapham, inventor Ray Kurzweil and many other fascinating thinkers on various topics related to culture, technology, and innovation.

He is the 2006 winner of the Barry Hannah Prize in short fiction, was a finalist for the 2004 One Story short story competition, and was the winner of the 2006 Eugene Walter Award for the Novel. He holds a master's degree in writing from Johns Hopkins and his short stories have appeared in such literary journals as *The Yalobusha Review*, *Main Street Rag*, and *Touchstone*
